\*2016 ENTITY THAT LOST WUG DESIGNATION IN 2021 PLANNING CYCLE

(4) Total connection includes residential, commercial, institutional and light industrial connections. The data is self-reported by the public water systems in their annual water use survey submitted to TWDB. If a system did not submit their survey, rolled-over estimates from the previously reported year are used. The water use survey data is reviewed by TWDB staff and data is revised as additional or more accurate data becomes available.

(5) Defined as total water production less sales to other water users in ACFT. The data is self-reported by the public water systems in their annual water use survey submitted to TWDB. If a system did not submit their survey, rolled-over estimates from the previously reported year are used. The water use survey data is reviewed by TWDB staff and data is revised as additional or more accurate data becomes available.

(6) Population served by a water system. Note that this number may include transient population such as tourists, seasonal workers or daytime commuters that might have been captured in other PWS utilities. The data is self-reported by the public water systems in their annual water use survey submitted to TWDB. If a system did not submit their survey, rolled-over estimates from the previously reported year are used. The water use survey data is reviewed by TWDB staff and data is revised as additional or more accurate data becomes available.
