James Toler
WUG Representative
Moscow WSC
PO BOX 136
Minden, TX 75680

Subject: East Texas Regional Water Planning Area
Population, Municipal Water Demand, and Water Source Projections

Dear Mr. Toler:

The Water User Group (WUG) Moscow WSC is located within the water planning region known as the East Texas Regional Water Planning Area (ETRWPA, or Region I). The East Texas Regional Water Planning Group (ETRWPG) is in the process of updating the regional water plan for the ETWPWA to be adopted in 2021. For information about the ETWPWG or to see the schedule of upcoming meetings, please visit www.etexwaterplan.org.

The Texas Water Development Board (TWDB) has developed draft projections for the population and annual municipal water demands for your WUG, which can be found online at www.twdb.texas.gov. For your consideration, please review the following tables, which summarize population (Table 1), municipal water demand (Table 2), and water source (Table 3) projections for the Moscow WSC. These tables are derived from the TWDB draft projections referenced above.

Table 1 - Moscow WSC Population by Decade

Water User Group	2020	2030	2040	2050	2060	2070
Moscow WSC	356	398	430	459	482	500

Table 2 – Moscow WSC Water Demand Projections by Decade

Projection Type	Base GPCD (2011)	2020	2030	2040	2050	2060	2070
Water Use (GPCD) ¹	141	130	127	124	124	124	123
Municipal Demands (af/yr) ²	---	52	57	60	64	67	69

¹ Water use values have been back-calculated from published TWDB population and water demand projections.

² Water demand projections are measured in acre-feet per year (af/yr) and include 2011 per capita water use, measured in gallons per capita per day (GPCD). For discussion of per capita water use calculation,

please refer to the “Draft Population and Municipal Water Demand Projections Methodology for the 2021 Regional Water Plans” document on the TWDB website.

Table 3 –2016 Regional Water Plan Water Sources for the Moscow WSC

Source Region Name County (Seller WUG, if applicable)
Not Applicable

- Are the population projections in Table 1 accurate for your WUG?
- Do you believe the water use (GPCD) projections in Table 2 to be reasonable?
- Do you agree with the municipal water demand projections that have been developed?
- Do your current water sources match with the sources in Table 3?
- Do you have a water plan developed or updated since January 2015?

If you do not agree with the draft projections or water sources, or would like additional information about this request, we want to hear from you as soon as possible. Please see contact information below.

The ETRWPG will be considering these projections at its November 15, 2017 meeting. If we do not hear otherwise from you, the draft projections and water source information will be accepted for purposes of the regional water plan update to be adopted in 2021.

In addition, for applicable entities, do you have water conservation plans or drought contingency plans developed or updated since January 2015? Please note that plan updates for applicable entities are due May 1, 2019 to the TWDB and the Texas Commission on Environmental Quality. Please let your consultant team representative know if you have any questions about preparing water conservation plans or drought contingency plans.

Your ETRWPG consultant team representative is:

Rex Hunt, P.E.
rhunt@apaienv.com
Phone: (512) 452-5905
Fax: (512) 452-2325

Alan Plummer Associates, Inc.
6300 La Calma Drive, Suite 400
Austin, TX 78752-3825

The ETRWPG will provide ongoing updates of the regional water planning process in this cycle. In the meantime, please send any comments or questions to your ETRWPG consultant team representative. Thank you for taking time to review this information.

Yours very truly,

A handwritten signature in black ink, appearing to read 'K. Holcomb'.

Kelley Holcomb, Chair
East Texas Regional Water Planning Group
